

PF-20T/PF50T Power On Procedure

- 1) Push the line cord securely into the amplifier's IEC connector and plug the other end into a grounded AC outlet.
- 2) Make sure both switches are in the down (OFF and WARM UP) position.
- 3) Turn the amplifier on by pressing the power switch to the ON position.
The light on the front of the amp will illuminate RED.
- 4) Wait 30 seconds.
- 5) Press the Standby switch to the up (PLAY) position.
The light on the front of the amp will illuminate RED.
- 6) While playing the instrument, adjust the gain and volume knobs to the preferred level.
- 7) Adjust EQ to taste.

Power Off is the reverse of Power On
